As part of the discovery process, you will need to access the location where the code was developed. This location is a cloud-based environment created by Microsoft.

It is commonly referred to as a Source Code Control System (SCCS) [[Source Code Control System - Wikipedia](#)].

The present Microsoft SCCS is an evolution of Teams Foundation Server (TFS) and is now called DevOps. [[Azure DevOps Server - Wikipedia](#)]

The project has a website address: <https://dev.azure.com/NeuroDyneLabs>

1 This repository can be accessed by two methods, using a web browser to get an overview of the project
2 and more specifically using Visual Studio to access the code and its history. [[Visual Studio: IDE and Code Editor](#)
3 [for Software Developers and Teams \(microsoft.com\)](#)].

4 Microsoft maintains a security mechanism for accessing code repositories. A user needs to be
5 authenticated and be authorized by the repository owner. You will receive an invitation by email generated by
6 Microsoft.

7 Ownership of this repository can be transferred to you, giving you full control or disposition of the project
8 repository.

9 The files related to the software development will be placed in a Google drive repository and will be shared
10 with a user of the same email.

11 Access to the Google Drive is at [BrainFingerprinting - Google Drive](#)

12 The product of this software development consists of executable programs that were exclusively
13 communicated with Dr. Lawrence Farwell and nobody else.
